Beyond Compliance towards a Preventive Culture by VISION ZERO – a Global Strategy for Safety, Health and Wellbeing

Part 1

Occupational accidents and work-related diseases take a heavy human toll on the world and cause significant economic losses. Every day, more than 7,500 people die due to unsafe and unhealthy working conditions - the global economic loss is estimated at 4% of global gross domestic product (GDP) – the fatality rate in mining is 8 times higher.

The United Nations Sustainable Development Goals (SDG's) address these human and economic tragedies by calling for "economic growth based on decent work" (SDG 8) and "good health and well-being" (SDG 3) at work.

Against this backdrop, the International Social Security Association (ISSA) proposed a new prevention strategy: VISION ZERO, which was developed and first introduced by the ISSA Mining Section. The webinar will deliver sound knowledge on VISION ZERO, it's 7 Golden Rules, the available tools and best practices from industry.
